

Why Us.

- Principals of the company are Technical People.
- We are Affordable.
- Serving since 2003.
- We Educate companies on how best they can use IT.
- Every software system we develop is custom tailored.
- Shadow resources on every project.

About Us

Founded by a group of ambitious software professionals, Sand Software Solutions is a fast growing software solutions & service provider company. Sand supports the needs, dreams and challenges of Startup's, Small & Medium sized businesses by offering them web, software solutions and services which allow them to look beyond their businesses. Sand has delivered easy-to-use, scalable, robust and customizable websites, web applications, software applications and related services to the specialized needs of art/design/media, manufacturing and internet-based businesses. With these solutions Sand has helped many companies to move out from their conventional business practices to web based thus allowing them to explore a new world of opportunities and multiply their revenues.

ERP

At Sand we have developed a fully Customizable, Web-based, OpenSource ERP (with CRM) system. Our ERP system is completely customizable. We show you our basic/core system and based on your requirements we develop the application and deliver.
